Profile

Freelance software engineer specialized in **backend and infrastructure (Python, APIs, Docker, AWS)**. Development of web applications and integration of AI systems (LLMs), including streaming and performance handling. Experience working on deployed and secured environments (AWS, VPN, reverse proxy). **Available for freelance missions.**

Skills

Development

- Python (FastAPI, Django)
- JavaScript, HTML5, CSS3
- Node.js, React

Infrastructure

- Docker, AWS
- Git, GitHub
- Linux, Windows

Data & Languages

- SQL, MySQL
- French (native)
- English (B2)

Projects & Experience

Reekon Security, cybersecurity & software solutions

Taipei, Taiwan

Software Developer Intern

September 2025 – December 2025

- Development and customization of an internal AI assistant platform (OpenWebUI fork)
- Implementation of backend pipelines in **Python** for integrating LLM models with streaming
- Design of dynamic interfaces for different use cases (document generation, evidence analysis)
- Deployment and securing of infrastructure on **AWS (Docker, private VPN, reverse proxy)**

ATIM, designer and manufacturer of IoT sensors & M2M solutions

France

R&D Development

June 2023 – September 2023

- Development of a web application for estimating sensor battery life
- Implementation using **JavaScript, Node.js** and **SQL**
- Database optimization and internal tool automation

Holo'Réed, engineering project

France

Best ESIGELEC Engineering Project Award 2024 🏆

2023 – 2024

- Development of a web platform for monitoring patients with Parkinson's disease
- Backend in **Python** with REST API and **MySQL**
- Frontend in **HTML/CSS/JavaScript**

Education

ESIGELEC (French Engineering School)

Rouen, France

Engineering Degree in Computer Science (C.E.R.T specialization)

2021 – 2025

- Training in web development, backend, networks and systems
- Vice-President of the Student Union 2022-2023 (Apollo)

Vaucanson High School

Grenoble, France

Preparatory Classes for Engineering Schools (CPGE PTSI/PT)

2019 – 2021

- Physics and Technology track

Interests

- Self-taught pianist; development of an **piano roll generator from audio files** (Python)
- Travel (Japan, Spain, New Caledonia, Taiwan)
- Dance (Hip-hop and Modern Jazz)
